About the Class:

This course is designed for Officers transitioning from a patrol assignment to an assignment in investigations. It will demonstrate the importance of investigative techniques and reinforce the importance of such techniques. It will give the student an understanding of the role the 5th Amendment plays in interviews and interrogations, providing the student the ability to navigate and obtain a court admissible statement.

The students will be able to apply sound investigative techniques in documenting a crime scene and learn to provide a voice to the physical evidence recovered during the investigation. The students will learn to apply the requirements set forth in the 4th Amendment in the recovery of evidence during the crime scene investigation, review case studies and are encouraged to interact with the instructor regarding investigative techniques. The course will prepare the student with the skill set to document a crime scene through forensic photography, crime scene diagramming and how to identify, collect and preserve physical evidence. The students will then work a mock crime scene and present the result of their investigation.
