TO THE TOP WITH THE CULTIVATION PROGRAM

DEPARTMENTS AND OFFICES

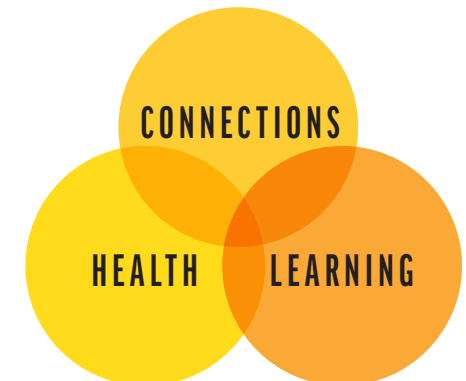

We care about your success now and after graduation. All employers look for a strong work ethic and experience in communication, teamwork, problem-solving and leadership. You have the edge when you display these qualities using examples from your DSA Team Member experience. We help you prepare for these workforce expectations through quality supervision and Cultivations.

Cultivations are short, impactful conversations with your supervisor or organization advisor that will enhance your education experience with intentional learning-focused conversations. This learning process results in quality reflection and intentional integration of new knowledge and perspectives.
